EDITION 58

2017
scalextric.com

WHAT'S NEW FOR 2017

This year is a very exciting one for Scalextric as it's the 60th Anniversary year!

In 1957 the Scalextric brand first appeared and created much excitement. It offered a new way to re-create the real world of racing in the home and provided many families with many hours of fun and excitement that still exists to this day.

2017 takes Scalextric racing to another level with new sets, new cars, but most thrillingly a collectable range of seven specially decorated cars celebrating the seven decades of this iconic brand.

We hope you enjoy what you find in the next pages...

A CAR FOR EACH DECADE

Collect all 7! Keep an eye on Scalextric.com/60th for updates on these 7 collectible cars!

1950s

SCALEXTRIC
RF60

It's 1957 and Scalextric makes a spectacular arrival at the Harrogate Toy Fair, then the premium event for the toy industry. Immediately the brand makes an impact, with young boys putting it on or near the top of their Christmas wish list!

Fangio and Moss – two of the world's most famous and successful Formula One drivers, drove this all-conquering Italian-built front-engined car, that was the last of its breed before the new rear-engined types arrived on the scene.

Expected Arrival: November 2017

Car 7

1960s

SCALEXTRIC
RF60

The 1960s saw the Scalextric brand develop and grow, with new cars, track pieces and sets appearing to satisfy the ever growing appetite of the young and now adult racers too. This was the decade where working lights were first added to the cars.

This lightweight version of arguably the 60s most iconic car, once described by Enzo Ferrari as "the most beautiful car ever made", raced to great success in many sports car events, flying the flag for its British manufacturer.

Expected Arrival: October 2017

Car 6

1970s

SCALEXTRIC
RF60

The 1970s was a difficult decade for the brand, and it mirrored the economic plight of the UK at the time. However it was the decade where tampo printing was introduced, which added far more detail to the cars, reflecting the increased sponsorship the real thing were carrying.

Rallying had a car in the 1970s that summed the decade up. With its then unusual futuristic look, the car was immensely successful and soon became an icon and one wanted to be driven by the top drivers of the day.

Expected Arrival: September 2017

Car 5

1980s

SCALEXTRIC
RF60

Magnatraxion was added to the cars during the 1980s. This helped racers keep the ever-improving performance and speed of the cars on the track, but still enabled the skill required to be improved as well. New technology also enabled fabulous detail to be included.

As part of the huge Volkswagen group this highly recognisable car had huge resources behind it to make it hugely successful during the decade. With its 4 wheel-drive technology, it took full advantage of the rule change in the rally racing world during this period.

Expected: August 2017

Car 4

OF SCALEXTRIC...

7

1990s

In the 1990s production moved from the UK to China. This enabled the high detail now demanded by the consumer to be made available at a realistic price, plus resources for the design and development could be stepped up in the UK headquarters.

Winning more titles than even the Porsche 911, this high-performance German built car has been raced in many events across the world, racing under the manufacturer's team colours, as well as other top teams such as Prodrive and AC Schnitzer.

Expected Arrival: July 2017

Car 3

2000s

The start of the new millennium saw the introduction of digital power bases, giving the opportunity to race more than one car on any lane. Now up to six people could race together at any one time. The new technology led the way to a new kind of exciting racing!

The car we will release from this era will be a racing edition of one of the U.K.'s most prestigious brands. It was highly successful at the Le Mans 24 hours as well as many others across the decade.

Expected Arrival: June 2017

Car 2

2010s

C3831A

GT3 cars are amongst the most popular racing on today's racing circuits and the first car of the 60th Anniversary Collection to be announced is the Bentley Continental GT3.

As Scalextric entered the second decade of the 21st century it has continued to bring technological advances to the slot racing arena. Following Digital has come ARC; a race management system that allows the user to wirelessly manage all elements of the 'Scalextric race experience' using Bluetooth technology via a tablet or smart device. ARC seamlessly merges the excitement of real-time slot racing, with the thrill of on screen gameplay.

The car releases have also kept pace with the real racing world. Lewis Hamilton has featured along with his Mercedes F1 car, the GT ranks have been swelled by the popularity of the GT3 class of racing and historic fans have been treated to ever more detailed and iconic versions of the Lotus 49 and 72.

The Bentley Continental GT3 is just one of many GT3 race cars now offered by Scalextric. Making its competitive debut at the 2013 Gulf 12 Hours in Abu Dhabi on 13th December 2013, many scoffed that a car the size of the Continental would be successful but it has proved to be an amazing car, powerful and well handling it is still one of the best cars in its class. The Abu Dhabi race would mark Bentleys return to motorsport ten years after its dominant win at the 24 Hours of Le Mans in 2003 and as of now the car continues to win in the Blancpain GT sprint and Endurance series, British GT, GT Cup and on many Scalextric layouts across the world.

C3831A Bentley Continental GT3 - Expected Arrival: May 2017

LEGENDS & LIMITED EDITIONS

Recreate some truly historic races with the Legends Collection of limited edition Scalextric models, featuring highly detailed, collectible slot cars from the golden era of motorsport.

1:32 SCALE

LOTUS 72

C3833A

Legend

Expected Arrival: Q2 2017

NEW

Race:
South African GP, 1974
Driver:
Ian Scheckter
Number:
29

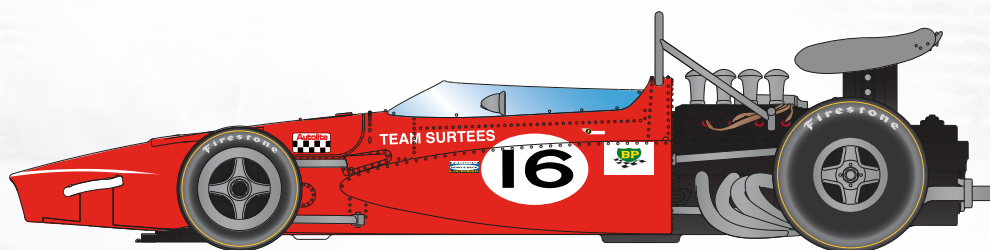

Race: South African GP, 1974, Result 13th

Team Gunston was a name used by Rhodesian racing driver John Love to enter his own cars in Formula One and sports car racing in South Africa between 1962 and 1975. He also entered cars under his own name, i.e. John Love. Commonly the vehicles were entered for Love himself, but he also provided cars for a number of other drivers during the period.

In 1974 Team Gunston entered the South Africa GP held at Kyalami with drivers Ian Scheckter (Jody Scheckters elder brother) and Paddy Driver. After starting the race back in 22nd position Ian Scheckter managed to pull through the pack and after a few around him retired ended up finishing in 13th place.

Limited Edition: 2000

McLAREN M7C

C3834A

Legend

Expected Arrival: Q3 2017

NEW

Race:
Dutch GP, 1970
Driver:
John Surtees
Number:
16

Race: Dutch GP, 1970, Result 6th

No man is ever likely to emulate John Surtees' feat of winning World Championships on two wheels and four. A racer who would be equally at home in the Halls of Fame of both motorcycle and car racing, 'Big John' rarely won the accolades his success deserved. Surtees' prowess on motorcycles won him universal respect, and soon after trying out cars for Vanwall and Aston Martin in 1959, he switched full-time to cars in 1960. Having driven for Lotus, Ferrari, Honda and BRM, Surtees then set up Team Surtees in 1970. The season didn't start too well with the first 3 races all ending in retirement, but in round 5 at the Dutch GP held at Zandvoort Surtees got his first point of the season. Surtees had to work hard after Qualifying 14th, but after some luck through others retiring Surtees held on to the final points position.

Limited Edition: 2000

TYRRELL F1

C3759A

Legend

Race:
USA GP, 1971
Driver:
François Cevert
Number:
9

Race: USA GP, Watkins Glen, 1971, Result 1st

In 1971 François Cevert became only the second Frenchman to win a Formula One World Championship Grand Prix (Maurice Trintignant won at Monaco in 1955 and 1958), and the result helped him take third place in the 1971 Driver's Championship behind Stewart and Ronnie Peterson. The win would stand as his only victory.

At Watkins Glen, USA, the final race of the '71 season, Stewart had already wrapped up his second world title. In the race, the Tyrrell twins held their customary one and two positions, only Denis Hulme's McLaren seeming able to mount any kind of challenge.

Then both Stewart and Hulme started to experience handling problems and Jackie waved François through into the lead. Despite a late challenge from a hard charging Jacky Ickx in the Ferrari, Cevert held on to the lead while Ickx's car broke under the strain and claimed his first F1 championship win.

Limited Edition: 5000

LEGENDS

BRABHAM BT26A-3

C3702A

Legends

Race:
Spanish GP, 1969
Driver:
Jacky Ickx
Number:
4

**Race: Spanish GP, 1969, Result 5th**

The 1969 Spanish Grand Prix was a Formula One motor race held at the Montjuïc circuit on May 4, 1969. On the ninth lap Hill's rear wing failed and he crashed heavily but emerged uninjured. Eleven laps later the same thing happened to Rindt crashing into Hill's abandoned car.

The crash left Amon in a commanding lead over Siffert, although he disappeared on lap 31 with an engine failure, leaving Stewart in second place, over half a minute behind Amon. On lap 52 Brabham's race ended with an engine failure and five laps later Amon's Ferrari V12 seized.

This left Stewart in the lead with Ickx trailing him, although the Belgian's rear wing failed leaving McLaren to take second. In the closing laps Ickx suffered rear suspension failure and he retired. A famous race of high attrition and danger which led to this race being the end of the high wing era in Formula One.

Limited Edition: 5000

TEAM LOTUS 72

C3703A

Legends

Race:
French GP, 1973
Driver:
Ronnie Peterson
Number:
2

**Race: French GP, 1973, Result 1st**

This model is based on the John Player Special Lotus 72E 1973 French Grand Prix winner, driven by Ronnie Peterson. The French Grand Prix would be Peterson's first GP win of the year and would be followed by three more wins at the Austrian, Italian and United States Grand Prix.

John Player Special Lotus team would go on and win the 1973 Constructors title and Peterson would finish third in the Driver's Championship behind Stewart in first and Fittipaldi in second.

Limited Edition: 5000

LOTUS 49

C3701A

Legends

Race:
Nurburgring GP, 1969
Driver:
Graham Hill
Number:
1

Race: Nurburgring GP, 1969, Result 4th

In the 1969 F1 season round 7 took Graham Hill and his Lotus 49 to the notorious Nurburgring. After a disappointing few grand prix before arriving in Germany, Hill struggled in qualifying managing only to put his Lotus on to 9th on the grid.

After the poor qualifying, Hill's luck seemed to change slightly; a crash at the beginning of the race saw Vic Elford (who was running 6th) land upside down in the trees and inevitably out of the race.

Further retirements for Piers Courage, Jochen Rindt and Denny Hulme who all started ahead of Hill meant that Hill finished in 4th position 4 minutes behind race winner Jackie Sticks.

Limited Edition: 5000

McLAREN M7C

C3698A

Legends

Race:
USA GP, 1971
Driver:
Jo Bonnier
Number:
27

Race: USA GP, Watkins Glen, 1971

Joakim Bonnier, Sweden, founded his own team, Ecurie Bonnier, in 1969 to 1971 for the purpose of entering the F1 Championships with Lotus and McLaren cars. Having had a long driving career in F1 since 1956, 'Jo' had much experience with all the top-flight teams and had run his own teams since 1966.

The McLaren M7 series cars competed very successfully from 1968 through to 1970 as works entered 'Bruce McLaren Motor Racing' cars driven by Bruce McLaren, Denny Hulme and Dan Gurney but from the turn of the decade the cars were then used by privateer teams run by John Surtees and Jo Bonnier.

In 1970 and 1971, Jo Bonnier drove a McLaren M7C under his Ecurie Bonnier team name in the 1970 United States Grand Prix Formula One race, held on October 4, 1970, at the Watkins Glen Grand Prix Race Course. This was his first race in the McLaren M7C but retired from the race at the half-way point with a broken waterpipe. The race was won by the new Lotus 72 driven by Emerson Fittipaldi.

INFO

Scalextric Helpline

Email: customercare@scalextric.com
Telephone: +44 (0) 1843 233525
Spare parts: Spare parts for current products may be available from Scalextric Service Dealers.

Electrical

Scalextric vehicles are fitted with electric motors operating from between 3-15 volts direct current. Mains electricity supply is reduced to this safe voltage by the appropriate Scalextric transformer and speed control is achieved by hand throttles wired to the track powerbase. Vehicles have pick-ups beneath the chassis which collect the electrical power from the track. Some control equipment is not suitable for use by children under 14 years except under adult supervision. Please check individual product packs for further information.

New releases

This catalogue shows items planned for introduction in 2016. Delivery periods may be subject to variation without notice. The illustrations of such items may not conform exactly to production versions. Where a photographic image of a real car is used, the body shape and /or livery of the production SCALEXTRIC model may differ to the car pictured.

Distribution

SCALEXTRIC products shown in this catalogue are available only through authorised retailers. The range shown will be varied in future years. Enthusiasts and collectors are invited to obtain their requirements whilst the item is in current production as additional production runs are not guaranteed. If you need assistance in obtaining any SCALEXTRIC product, please contact the SCALEXTRIC Helpline.

Dimensions

Sizes quoted in the catalogue are approximate. Hornby Hobbies Ltd reserves the right to alter designs, specifications, colours, liveries and prices without notice. This catalogue supercedes all previous editions.

Trademarks

SCALEXTRIC, SCALEXTRIC DIGITAL, SCALEXTRIC START, SCALEXTRIC SPORT, SCALEXTRIC SPORT DIGITAL, SCALEXTRIC SPORTWORLD, MY FIRST SCALEXTRIC, MICRO SCALEXTRIC, SCALEX, SCALEXTRIC SUPERSCALE, SUPERSLOT are Trade Marks of Hornby Hobbies Limited.
